Cleaning and structuring with laser radiation

About this organisation

Machine translation

This organisation has been machine-translated based on data provided in German.

cleanLASER develops and produces high-precision laser systems for laser cleaning and industrial surface treatment.

Clean-Lasersysteme GmbH (cleanLASER) specialises in the precise joining pre-treatment of lightweight materials using laser light. Automobile manufacturers, aviation companies and numerous suppliers in Germany and abroad have been using cleanLASER in series production for many years. Optimum results have been achieved with aluminium, copper and magnesium, for example. The flexibility and market maturity make this sustainable technology accessible to a wide range of users. In addition to industrial applications, the focus is also on continuous research and development. For example, the 3KLANK research project is developing a 3 µm beam source for use in the pre-treatment of fibre composite materials for bonding and painting.

Dornkaulstraße 6-8 52134 Herzogenrath North Rhine-Westphalia Germany

Cleaning and structuring with laser radiation

About this org	anisation
Main areas covered	Surface treatment, Laser beam source development, Measurement and process analysis technology, Feasibility studies
Infrastructure	Laser systems from 20 W to 1.6 kW, Optics development, Automation systems, Training and education centre
Certifications	ISO 9001, ISO 14001
Keywords	Laser process, Environmental friendliness, Structuring, Paint stripping and decoating, Pre-treatment
Memberships	LASER.region.AACHEN, AiF SME Research Network
