

# Engineering company for reliability and process modelling mbH

## About this organisation

### Machine translation

This organisation has been machine-translated based on data provided in German.

IZP Dresden is a cross-industry engineering service provider specialising in RAMS and LCC for products and processes. We offer special consulting services, tailored training and further education courses as well as software solutions for analysing, predicting and optimising the safety, reliability, maintainability and life cycle costs of technical systems.

We analyse and evaluate the safety and reliability of lightweight construction solutions in comparison to conventional systems. We use special analyses of the life cycle costs of lightweight construction products to provide evidence of the sustainability of lightweight construction concepts. By developing customised maintenance strategies, we support the optimal operation of lightweight construction systems while maximising safety and minimising costs. We minimise risks in the development process with FMEA and fault tree analyses.

Am Waldschlösschen 4  
01099 Dresden  
Saxony  
Germany

### Organisation type

Small or medium-sized enterprise

### Sectors

### Employees

Up to 9

### Turnover

Up to €2m

### Funding

# Engineering company for reliability and process modelling mbH

## About this organisation

**Main areas covered** Reliability analysis, FMEA and fault tree analysis, LCC analysis and optimisation, Risk analyses, Sustainability analyses

**Infrastructure** Seminar room, RAMS/LCC software tools

### Certifications

**Keywords** RAMS/LCC, Risk analyses, Reliability analysis, Maintenance strategy, FMEA and FTA

**Memberships** Rail.S

## Overview of lightweighting expertise
