

About this organisation

Die Math2Market GmbH wurde im September 2011 von den Entwicklern der GeoDict Software aus dem Fraunhofer Institut für Techno- und Wirtschaftsmathematik (ITWM) in Kaiserslautern ausgegründet. Dort wurde bereits von Andreas Wiegmann und seinem Team ab 2001 der Grundstein zu GeoDict gelegt.

Die Software GeoDict®, der innovative und einfach zu bedienende Materialsimulator, bietet die Komplettlösung zur Multi-Skalen 3D Bildverarbeitung, Modellierung von Materialien, Visualisierung, erfolgreichen Charakterisierung von Materialeigenschaften, simulationsgetriebenen Materialentwicklung und Optimierung von Prozessen. Ob für neu entwickelte oder bestehende Werkstoffe, computergestützte Simulationen mit GeoDict ermöglichen ein qualitatives und quantitatives Verständnis der geometrischen und physikalischen Eigenschaften von Werkstoffen. Einige der simulierten Eigenschaften sind im Labor nur schwer oder gar nicht messbar. Häufig zerstört der Labortest die Probe und macht sie für die Analyse anderer Eigenschaften unbrauchbar. Der Einsatz von Simulationen ergänzt und vervollständigt somit die Labormessungen und liefert nicht nur detaillierte Informationen, sondern auch neue Erkenntnisse.
