

About this organisation

Machine translation

This organisation has been machine-translated based on data provided in German.

Rosswag Engineering manufactures 3D-printed metal components from stainless steel, tool steel, aluminium, titanium and nickel-based alloys. In addition, the company offers material development for the metal 3D printing process, as well as engineering services and design workshops for additive technology.

The service portfolio offers a unique process chain that ranges from the production of high-quality metal powder to additive metal 3D printing production on two systems, specific heat treatment, CNC reworking, testing of mechanical and technological properties in the in-house materials laboratory and comprehensive quality assurance. The Rosswag Engineering and Edelstahl Rosswag divisions together form Rosswag GmbH. Since 1911, this company with over 200 employees has stood for the highest quality, innovation and precision in the manufacture of components from over 400 different metals and special materials.

About this organisation

Main areas covered	Metal 3D printing with aluminium/steel, Selective laser melting / SLM, Powder material development for SLM, Component production using SLM, Topology optimisation using SLM
Infrastructure	2 metal 3D printing systems, Test laboratory for tensile tests, etc.
Certifications	ISO 9001, DIN ISO 9100, BS OHAS 18001
Keywords	3D PRINTING, HIGH-PERFORMANCE MACHINING
Memberships	

Overview of lightweighting expertise

Machine translation

This organisation has been machine-translated based on data provided in German.

	Research	Development	Manufacturing & Supply
Offer			
Products Materials, Tools and moulds		✓	✓
Services & consulting Training, Consulting, Testing and trials, Engineering, Prototyping, Validation, Simulation		✓	✓

Overview of lightweighting expertise

Machine translation

This organisation has been machine-translated based on data provided in German.

	Research	Development	Manufacturing & Supply
Field of technology			
Design & layout Lightweight manufacturing, Hybrid structures, Lightweight construction concepts		✓	✓
<i>Functional integration</i>			
Measuring and testing technology Component and part analysis, Visual analysis (e.g. microscopy, metallography), Materials analysis, Destructive analysis, Non-destructive analysis		✓	✓
Modelling and simulation Life-cycle analysis, Optimisation, Processes, Structural mechanics, Materials		✓	✓
<i>Plant construction & automation</i>			
Recycling technologies Recycling, Others (Production of metal powder for metal 3D printing from forging remnants)		✓	✓

Overview of lightweighting expertise

Machine translation

This organisation has been machine-translated based on data provided in German.

	Research	Development	Manufacturing & Supply
Manufacturing process			
Additive manufacturing 3D printing, Selective laser melting (SLM, LPBF, ...), Others (with stainless steel, aluminium, tool steel, titanium and nickel-based material)		✓	✓
<i>Coating (surface engineering)</i>			
<i>Fibre composite technology</i>			
<i>Forming</i>			
<i>Joining</i>			
<i>Material property alteration</i>			
<i>Primary forming</i>			
<i>Processing and separating</i>			
<i>Textile technology</i>			

Overview of lightweighting expertise

Machine translation

This organisation has been machine-translated based on data provided in German.

	Research	Development	Manufacturing & Supply
Material			
<i>Biogenic materials</i>			
<i>Cellular materials (foam materials)</i>			
<i>Composites</i>			
<i>Fibres</i>			
<i>Functional materials</i>			
Metals			
Aluminium, Steel, Titanium, Others (Metal powder for metal 3D printing)		✓	✓
<i>Plastics</i>			
<i>Structural ceramics</i>			
<i>(Technical) textiles</i>
