### C-TEC ENGINEERING

### About this organisation

#### **Machine translation**

This organisation has been machine-translated based on data provided in German.

C-TEC, a young and innovative company based in Blaustein, specialises in the development and production of intelligent devices, machines and systems for industrial production. We offer the entire spectrum from engineering and production to assembly and commissioning from a single source. Since 2015, the company has been designing and developing lightweight box bodies in a modular design.

C-TEC is significantly involved in the development of lightweight frames using extremely light but robust aerospace materials, which enable a significant reduction in emissions and an increase in payload. The company also offers modular, climate-friendly lightweight construction solutions for efficient last-mile concepts. Since 2019, C-TEC has been designing ultra-light, aerodynamically optimised box bodies using recycled materials and developing vehicle-specific wind deflectors with the aim of maximising payload while minimising climate-damaging emissions.

Employees 10 up to 49

**Turnover** €2m - €10m

**Funding** 

Werrengasse 32 89134 Blaustein Baden-Württemberg Germany
