

About this organisation

Machine translation

This organisation has been machine-translated based on data provided in German.

The knowledge and skills of our employees in the fields of calibration equipment, vibration and shock exciters, services and customised measuring and testing systems are mutually utilised and multiplied. Together with the experience from our own service sector, product solutions are developed that give us and our customers a joint advantage in the market.

Many special customer requirements for our products have later resulted in standard products that enrich our product and service range. In the field of lightweight construction, SPEKTRA offers structural and modal analysis to investigate the behaviour of structures when subjected to force. From their evaluation, insights can be gained as to how the architecture can be optimised to withstand the environmental conditions.

Heidelberger Str. 12
01189 Dresden
Saxony
Germany
www.spektra-dresden.com

Organisation type
Small or medium-sized enterprise

Sectors
 Others: Hersteller und Dienstleister von Mess- und Prüftechnik

Employees
50 up to 249

Turnover
€2m - €10m

Funding

Main areas covered
Structural analysis, Modal analysis

Infrastructure
Calibration, Environmental test, Modal analysis, Structural analysis, Sensor characterisation

Certifications
ISO 9001, ISO 17025

Keywords
Environmental assessment, Characterisation, Modal analysis, Calibration

Memberships
AMA, Silicon Saxony, ISO, DIN, DKD

Overview of lightweighting expertise
