

LAU GmbH & Co. KG

Hemp - materials" range

About this organisation

Machine translation

This organisation has been machine-translated based on data provided in German.

Lau GmbH & Co. KG is an agricultural business in Central Saxony that has been growing industrial hemp since 2018 in addition to the traditional cash crops of wheat and maize and sugar beet.

Through partnerships with regional research institutions in Dresden, Chemnitz and Rudolstadt and with the Fraunhofer Institute IAP in Wildau, targeted developments have been carried out in recent years on innovative harvesting technologies and the machinery and equipment required for the harvesting, provision and initial processing of hemp straw, both for the material use of selected plant parts for various lightweight construction applications with different biogenic matrix systems and for textile applications in the form of spinnable native fibres or regenerated fibres (Lyohemp).

An der Schnauder 22
04741 Roßwein, OT Littdorf

LAU GmbH & Co. KG

Organisation type

Small or medium-sized enterprise

Sectors

No specific sector

Employees

Up to 9

Turnover

Up to €2m

Funding

Main areas covered

Cultivation and harvesting of hemp, Processing into fibres + bast bark, Processing into hemp straw powder

Infrastructure

Specialised hemp harvesters, Machine line grinding to powder, Laboratory equipment for determining characteristic values

Certifications

2019 GLOBAL G.A.P. certification

Keywords

Components for bioplastics, Semi-finished products for lightweight materials

Memberships

ZIM Network Hemp Lyocell
