

About this organisation

Machine translation

This organisation has been machine-translated based on data provided in German.

thoenes® is a medium-sized company with 145 years of experience in the production of technical textiles in the form of cords and hoses. As a manufacturer of a wide range of products, in addition to sealing and insulating products, we also produce braids and small circular knitted fabrics for lightweight construction and technical applications, as well as continuous fibre-reinforced hollow profiles and steel-free reinforcement brackets for construction applications.

Modern braiding machines are used to process high-performance fibres such as carbon, glass and aramid into preforms and components. As part of successfully implemented R&D projects, processes and methods have been developed to produce thermoplastic hollow profiles with continuous fibre reinforcement on the one hand, and to produce reinforcement stirrups made of glass, carbon or basalt fibres on the other.

Zeppelinstraße 1

About this organisation

Main areas covered	Lichens, Preforming, Prepreg wrapping
Infrastructure	Pressing station for roller cores
Certifications	DIN EN ISO 9001:2015, DIN EN ISO 14001:2015, DIN EN ISO 45001:2018
Keywords	Lichens, Preforming
Memberships	Composites United e.V., futureTEX Partner, Energy Saxony e.V.

Overview of lightweighting expertise
