

About this organisation

Machine translation

This organisation has been machine-translated based on data provided in German.

We are a supplier of fibre laying machines.

Among other things, we have developed a TFP system (Tailored Fibre Placement). The advantages of our machines are Mapping of the fibre direction along the force flow lines in the fibre composite component, minimisation of waste, continuous fibres, use of cheaper raw fibres, possible combination with other preform technologies, use of hybrid rovings (e.g. thermoplastic with CFRP) possible.

Albstraße 50  
72474 Winterlingen
