

About this organisation

Machine translation

This organisation has been machine-translated based on data provided in German.

nebumind is committed to quality management in manufacturing. In order to reduce costs for quality/non-quality, nebumind offers software for analysing component quality. The software visualises production data as "digital component twins" and enables errors to be traced and detected in the ongoing production process, comprehensive documentation of each component to be created and machines to be run in more quickly.

As the nebumind software can offer great added value, especially in complex manufacturing processes with high quality requirements, the potential for use in the field of lightweight construction is correspondingly high. The founders of nebumind have long been active in the fields of composite and additive manufacturing with their own sensor development for "in-process" quality control in the automated fibre placement process. The challenges regarding quality drivers, correlations and other influencing factors are therefore very well known. With its software, nebumind hopes to sharpen insights into manufacturing quality in lightweight construction and optimise production processes.

Willy-Messerschmitt-Str.
82024 Taufkirchen
Bavaria
Germany

Main areas covered Data analysis software

Infrastructure Process chain

Certifications

Keywords digital twin, smart manufacturing, quality 4.0, data analytics

Memberships bavAIRia e.V., AVIASPACE BREMEN e.V.

nebumind

Organisation type
Small or medium-sized enterprise

Sectors

Employees
10 up to 49

Turnover
n/a
