

About this organisation

Machine translation

This organisation has been machine-translated based on data provided in German.

GreenDelta is an independent engineering, consultancy and software development company founded in 2004 by Dr Andreas Ciroth. We work in all areas of life cycle assessment and sustainability, and we try to find improvements in sustainability for products and organisations, i.e. a "green delta".

GreenDelta develops openLCA, the world's leading, feature-rich, open source and free software for sustainability and life cycle assessment. The flexibility of the tool allows for dedicated and specific applications, including for the sustainability assessment of hybrid and lightweight materials.
