

About this organisation

Machine translation

This organisation has been machine-translated based on data provided in German.

With a team of 25 engineers, Lasso develops solutions for numerous business areas. The specialists use CAE in the early stages of product development to map the behaviour of components under various influences and design them to meet different requirements. The finite element method has become established in many areas of industry. It increases the effectiveness of product development and helps to reduce costs.

Use of state-of-the-art calculation and optimisation methods

Leinfelderstraße 60
70771 Leinfelden-Echterdingen
