## About this organisation

### Machine translation

This organisation has been machine-translated based on data provided in German.

We are a medium-sized family business with more than 20 years of experience in the manufacture of infrared heaters and gas burners and the design of infrared systems for industrial drying and heating solutions. Our mission is to support our customers in increasing throughput speeds and making processes greener and more resource-efficient. To this end, we develop customised heating solutions.

Our technology can be used in all areas that require a heating or drying process step. Common areas of application are surface treatment (e.g. coating or painting) of various materials, non-contact plastic welding, forming of materials or joining of different materials. Adhesive-free connections between different components can also be achieved with the help of infrared.

Lohmühleweg 24  
72213 Altensteig  
Baden-Württemberg  
Germany

### Organisation type

Small or medium-sized enterprise

### Sector

### Employees

10 up to 49

### Turnover

n/a

### Funding

n/a

### Main areas covered

Infrared radiators, Infrared systems

### Infrastructure

Test modules for heating tests

### Certifications

### Keywords

Infrared, Drying, Heating, Deformation, Infrared radiators

### Memberships

# Infratec Infrarot Strahler GmbH

## Overview of lightweighting expertise
