

# DatenBerg GmbH

## About this organisation

### Machine translation

This organisation has been machine-translated based on data provided in German.

DatenBerg offers software for analysing process data in production. The offering covers the entire value chain from connectivity, visualisation and analysis through to automated evaluation. In addition to software, DatenBerg also offers services such as interface programming and data science services. The company is mainly active in the automotive and food sectors.

Complex production processes require complex decisions. With the automated process data analysis from DatenBerg, employees can create their own adaptive control loops. In this way, processes are optimised in terms of resource consumption and complex decision-making scenarios are solved by the computer. In addition to the integration of expert knowledge, process data is also analysed.

Haid-Und-Neu-Straße 7  
76131 Karlsruhe  
Baden-Württemberg  
Germany
