

FUCHS LUBRICANTS GERMANY GmbH

Product Management Forming / Cleaner / Corrosion Protection

About this organisation

Machine translation

This organisation has been machine-translated based on data provided in German.

FUCHS offers speciality products for hundreds of application areas. The product portfolio is divided into the core categories of automotive and industrial lubricants, metalworking fluids, lubricants for special applications and technical and process-related services.

Thanks to its insight into a wide range of industries and applications, FUCHS has a broad knowledge of raw materials and processes and can offer customised products based on its many years of experience. As a manufacturer of forming lubricants, among other things, FUCHS LUBRICANTS GERMANY GmbH is well aware of the requirements. With our forming lubricants, we serve the complete range of forming processes, from prelubes applied in steel or aluminium plants to high-precision and safety-relevant fineblanked workpieces. The trend towards weight reduction means that high-strength materials and light metals are increasingly being used. Thanks to our comprehensive knowledge of processes and raw materials, our forming lubricants can make a significant contribution to the production of workpieces and components made from these materials.

Friesenheimer Straße 19
68169 Mannheim
Baden-Württemberg
Germany
www.fuchs.com/de/de/

Main areas covered Corrosion protection for automotive, and industrial applications, Media for component cleaning, Punching, forming, Fineblanking and thermoforming media

Infrastructure

Certifications IATF 16949, ISO 14001, ISO 45001, ISO 50001
