About this organisation

Machine translation

This organisation has been machine-translated based on data provided in German.

ARI Motors GmbH is currently the provider of the smallest road-legal electric transporter in Germany. The name ARI stands for the Japanese word for ant - and our vehicles are just as powerful, manoeuvrable and versatile. Our declared aim is to bring cost-effective and powerful electric vans onto German and European roads.

For every possible requirement, we offer specially designed vehicle bodies analogous to a conventional van. This means that the classic range extends from a flatbed vehicle to a box body to a tarpaulin body. Individually configured refrigerated or heated boxes as well as tipper or alcove versions are also possible. All bodies - tailored to the needs of our customers - are produced in our factories in Borna and in Říčany near Prague. Here, the vehicles are also customised for the European market in order to meet the quality requirements of our customers.
