

About this organisation

Machine translation

This organisation has been machine-translated based on data provided in German.

We specialise in innovative insole concepts. Our range of services extends from the production of patented outsoles to industrial injection moulding. All products are manufactured on our own high-tech production lines in Germany.

The injection moulding machine fills the cavity of the inlay blank with plastic, effortlessly replacing six work steps. The result is a SPANNTEC® base blank without transitions, with a soft edge and load-bearing core. Optionally made of plastic or cork. Our employees now process this blank manually according to customer requirements.
