

About this organisation

Machine translation

This organisation has been machine-translated based on data provided in German.

SGL Carbon is a technology-based global leader in the development and manufacture of carbon-based solutions. Its high-quality materials and products made of speciality graphite and composites are used in future-oriented industrial sectors: automotive, aerospace, semiconductor technology, solar and wind energy.

Together with customers, SGL Carbon develops tailor-made lightweight solutions for large series applications at the Lightweight and Application Center in Meitingen, drawing on its broad material base and process expertise along the entire fibre composite value chain.

Werner-von-Siemens-Str. 18
86405 Meitingen
Bavaria
Germany

Organisation type
Large enterprises

Sectors
A row of eight black icons representing different industries: a car, a factory building, a lightning bolt, an airplane, a camera, a plus sign, a train, and a bicycle.

Employees
500 and more

Turnover
More than €50m

Funding
n/a

Main areas covered Lightweight construction solutions made from fibre composites

Infrastructure

Certifications ISO 9001, ISO 14001, ISO 50001

Keywords

Memberships

Overview of lightweighting expertise

Machine translation

This organisation has been machine-translated based on data provided in German.

	Research	Development	Manufacturing & Supply
Offer			
Products Parts and components, Semi-finished parts, Materials	✓	✓	✓
Services & consulting Consulting, Testing and trials, Engineering, Prototyping, Validation, Simulation, Technology transfer		✓	✓
Field of technology			
Design & layout Lightweight manufacturing, Lightweight design, Hybrid structures, Lightweight construction concepts		✓	✓
<i>Functional integration</i>			
Measuring and testing technology Component and part analysis, Materials analysis, Destructive analysis		✓	✓
Modelling and simulation Loads & stress, Life-cycle analysis, Processes, Materials, Reliability validation		✓	✓
<i>Plant construction & automation</i>			
<i>Recycling technologies</i>

	Research	Development	Manufacturing & Supply
Manufacturing process			
<i>Additive manufacturing</i>			
<i>Coating (surface engineering)</i>			
Fibre composite technology Fibre spraying, Filament winding, Manual lamination, Resin infusion process, Resin transfer moulding, Pre-preg processing, Vacuum infusion, Others (Thermoplastic pultrusion Wet moulding Thermoforming Fibre placement)	✓	✓	✓
<i>Forming</i>			
<i>Joining</i>			
<i>Material property alteration</i>			
<i>Primary forming</i>			
<i>Processing and separating</i>			
Textile technology Fibre manufacturing, Braiding, Yarn & roving production, Preforming, Textile surface treatment and finishing, Nonwoven & mats production, Weaving, Knitting, laid web production	✓	✓	✓
